| Sequence 8, Application US/09580018
| Sequence 8, Application US/09580018
| Patent No. 6761888
| GENERAL INFORMATION:
| APPLICANT: Schenk, Dale B. |
| APPLICANT: Bard, Frederique |
| APPLICANT: Yednock, Ted |
| TTILE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease |
| TTILE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease |
| TTILE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease |
| TTILE OF INVENTION: PROPOSTORY |
| TTILE OF INVENTION NUMBER: US 09/322,289 |
| PRIOR FILING DATE: 1999-05-28 |
| NUMBER OF SEQ ID NOS: 77 |
| SECTION O 8 |
| LENGTH: 10 |
                                                                                               APPLICANT: Schenk, Dale B.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                  Sequence 5. Application US/09580018

Patent No. 6761888
GENERAL INFORMATION:
BAPLICANT: Schenk, Daie B.
APPLICANT: Schenk, Ted
APPLICANT: Yednock, Ted
TILE OP INVENTION: Prevention and Treatment of Amyloidogenic Disease
FILE REFERENCE: 15270J-004760US
CURRENT PILING DATE: 2000-05-26
PRIOR APPLICATION NUMBER: US/09/580,018
PRIOR PILING DATE: 1999-05-28
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          OTHER INFORMATION: Description of Artificial Sequence:10-mer peptide OTHER INFORMATION: from AN1792 sequence (human Abeta42, beta-amyloid OTHER INFORMATION: peptide)

Sequence 9, Application US/09580018
| Sequence 9, Application US/09580018
| Patent NO. 6761888
| GENERAL INFORMATION:
| APPLICANT: Schenk, Dale B. |
| APPLICANT: Schenk, Ted |
| TITLE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease |
| TITLE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease |
| TILE REFERENCE: 15.27-04.766US |
| CURRENT APPLICATION NUMBER: US/09/580,018 |
| CURRENT PILING DATE: 1000-05-26 |
| PRIOR FILING DATE: 1999-05-28 |
| NUMBER OF SEQ ID NOS: 77 |
| SOFTWARE: PatentIn Ver. 2.1 |
| LENGTH: 10
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       US-09-580-018-10

; Sequence 5, Application US/09724551
; Patent No. 6787637
; GENERAL INFORMATION:
; APPLICANT: Schenk, Dale B.
APPLICANT: Yednock, Ted
; TITLE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease
; TITLE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease
; TITLE OF INVENTION: PREVENCE: 15270J-004760US
; CURRENT APPLICATION NUMBER: US/09/580,018
; PRIOR FILING DATE: 2000-01-28
; PRIOR FILING DATE: 2000-05-28
; PRIOR FILING DATE: 1999-05-28
; PRIOR FILING DATE: 1999-05-28
; NUMBER OF SEQ ID NOS: 77
; SOFTWARE: PatentIn Ver. 2.1
; SEQ ID NO 5
; LEMOTH: UO
APPLICANT: Schenk, Dale B.

Sequence 28, Application US/09589483

Patent No. 6797488

GENERAL INVORMATION:

APPLICANT: SUKhatheme, Vikas P.

TITLE OF INVENTION: METHODS OF PRODUCING ANTI-ANGIOGENIC

TITLE OF INVENTION: PROTEINS

FILE REPERENCE: 1440-1031010;

CURRENT APPLICATION NUMBER: US/09/589,483

CURRENT FILING DATE: 2000-06-07

PRIOR PILING DATE: 1998-11-16

; PRIOR APPLICATION NUMBER: US 60/108,536

; PRIOR FILING DATE: 1998-11-16
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        1; Indels

Patent No. 6653532

GENERAL INFORMATION:
APPLICANT: Raap, Maik
TITLE OF INVENTION: RECOMENS FOR INFLUENCING THE
TITLE OF INVENTION: FLOWERING BEHAVIOUR OF PLANTS
FILE REFERENCE: 23232.0001
CURRENT APPLICATION NUMBER: US/09/460,676B
CURRENT PILING DATE: 1999-12-14
PRIOR APPLICATION NUMBER: DE 19857654.4
PRIOR APPLICATION NUMBER: DE 19857654.4
PRIOR PILING DATE: 1008: 5
SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              70.8%; Score 17; DB 4; Length 8; 50.0%; Pred.
